## RESPONSE TO NOTICE OF MISSING PARTS

### 4. Remarks

In furtherance of the Response to the Notice of Missing Parts, this is to advise as follows.

Pursuant to the requirement, a copy of the Notice to File Corrected Application papers has been enclosed herewith.

The original drawings have been replaced by 7 sheets of new drawings. In these new drawings, Figs. 1 and 2 incorporate descriptive blocks, which are numbered in the same manner as corresponding parts are numbered in original Figs. 1 and 2, and which maintain essentially the same relationships as exist in original Figs. 1 and 2. All of the descriptive matter in the replacement draws is well supported by the descriptive matter in the original drawings and specification.

Original page 4 of the specification has been replaced by annexed new page 4, which incorporates two perfunctory changes to ensure correspondence with the new Figures.

It is believed that the application now is in good form for examination and that any further perfunctory changes can be made by Examiner's amendment. In the event that any significant further change is required, the Examiner is requested to call the undersigned at 617-523-3515 Ext. 201.
